Department	Industrial Management	
Faculty	Faculty Of Mechanical Engineering And Technologies	
<p>Learning objectives:</p> <p>The discipline ends in the preparation of future specialists and aims to summarize the knowledge they have gained in the various management disciplines and teach them how to use them to manage a particular business object. For this purpose, students are assigned separate tasks to collect and analyze information related to the main functions of management - planning, organization, control, motivation and coordination where the work is done in the different functional areas of the particular organization; namely financial management, production management, human resources management, marketing, logistics, etc.</p> <p>The theoretical aspects of the discipline are studied by the students in the previous semesters, which predetermines the successful implementation of the project. A final stage in their preparation is the presentation of a completed project with an analysis of the company's status and proposals for improvement of the management work.</p>		
CONTENTS:		
Training Area	Hours lectures	Hours seminar exercises
