<p>Learning objectives:</p> <p>To form the basic knowledge required for all specialists in the field of social sciences. To introduce the students to the origin of the state and the law, their historical development and the main notions in the science.</p> <p style="text-align: center;">/ANNOTATION/</p> <p>The discipline "Fundamentals of the State and Law" aims to form the basic knowledge required for all specialists in the field of social sciences. It introduces the students to the origin of the state and the law, their historical development and the main notions in the science: "public authority", "state apparatus", "form of government", "law", "legal norm", "legal responsibility" and others. The lecture cycle discusses the basic theoretical concepts of the nature and social purpose of the state, the causes and ways of its emergence, its elements and features. The historical development of law, its principles, functions, sources, structure, subjects are traced. This issue is clarified in the context of the peculiarities of the world legal systems and the comparison between them. The discipline is fundamental within the professional field "Social Activities" and forms the basic conceptual apparatus necessary for the overall education of students in the specialty "Social Management".</p>
