Faculty	Faculty of Naval Architecture		
ANNOTATION/Learning objectives:  The aim of the course is to introduces students to basic introductory topics of maritime English related to ship’s operation, ship’s construction, ship’s gear, types of merchant ships, ports, cargoes and ship and port cargo handling facilities. It also introduces typical maritime terminology so that acquired theoretical knowledge to be applied in practice and practical skills for reading comprehension of specialized English texts to be built up. The course aims at delivering to the students of Navigation theoretical knowledge of grammar in general English context which to be used as a basis for creating skills for audio comprehension of English texts (developing listening skills) as well as to prepare them to lead conversations so they can further apply acquired theoretical knowledge and practical skills in everyday oral and written communication in English language. The syllabus complies with the recommendations of the IMO Model Course 3.17 Maritime English.
