

Simulator – English for Maritime Emergencies (48)

Basic sections of the contents:

- Basics of the Standard Marine Communication Phrases (SMCP).
- International phonetic alphabet.
- Maritime English communications in different types of extreme situations (emergencies) – fire, explosion, flooding, grounding, sinking, search and rescue, etc., though use of SMCP.
- Form of presentation: The studies content is presented in the form of practical exercises. In addition students must do out-of-class work on the following topics: Man-over-board communications; Piracy/armed robbery situation communications; Medical advice communications. An optional of training – distant learning.
