

# C O N T E N T S

<b>Part I. Structure and properties of metals .....</b>	<b>7</b>
I.1. Crystalline structure of metals.....	7
I.2. Kinds of interatomic bondings in crystals.....	9
I.3. Impact of the structural characteristics on the mechanical behaviour of metals.....	12
I.4. Defects of the crystalline structure.....	14
I.5. Crystallization of metals.....	18
I.6. Structure of metals. Methods of investigation and control of defects.....	22
I.7. Deformation and destruction of metals.....	25
I.8. Properties of metals.....	30
I.9. Methods of mechanical testings.....	34
 <b>Part II. Basics of the theory of alloys .....</b>	 <b>44</b>
II.1. Metal alloys.....	44
II.2. Binary Phase diagrams.....	48
II.3. Components, phases and structural constituents of the alloy of iron with carbon .....	59
II.4. The iron-iron carbide phase diagram .....	60
 <b>Part III. Extraction of metals.....</b>	 <b>64</b>
III.1. Metallurgy of ferrous metals. Extraction of cast-iron.....	64
III.2. Extraction of steel .....	68
III.3. Physical and chemical processes during processing of cast-iron into steel .....	69
III.4. Extraction of non-ferrous metals .....	74
4.1. Extraction of aluminium and aluminium alloys.....	74
4.2. Extraction of copper and copper alloys .....	76
4.3. Production of titan .....	78
4.4. Hydrometallurgical methods of extraction of non-ferrous metals .....	79
 <b>Part IV. Casting of metals .....</b>	 <b>79</b>
IV.1. Foundry properties of metals and alloys .....	79
IV.2. Technology of obtaining castings.....	80

2.1. Cast moulds .....	80
2.2. Technology of obtaining of castings in clay sand moulds .....	81
2.3. Pouring system.....	82
2.4. Machine moulding .....	83
2.5. Air-pressure moulding .....	83
2.6. Vacuum moulding. ....	84
<b>IV.3. Melting and casting of metals .....</b>	<b>85</b>
3.1. Foundry properties of cast-iron and steel.....	86
3.2. Furnaces for cast-iron melting. ....	89
3.3. Pouring of the moulds with cast-iron.....	93
3.4. Melting and casting of steel .....	94
3.5. Melting and casting of non-ferrous metals and alloys ....	98
3.6. Casting into shell moulds and by fusible patterns .....	101
3.7. Die casting .....	104
3.8. Counter -pressure casting .....	107
3.9. Centrifugal casting.....	107
3.10. Casting in stilts .....	109
<b>Part V. Thermal tritment of metals and alloys .....</b>	<b>111</b>
<b>V.1. Hardening of carbon steel .....</b>	<b>113</b>
1.1. Surface hardening .....	115
1.2. Tempering.....	117
1.3. Ageing.....	118
1.4. Thermomechanical processing. ....	119
<b>V.2. Thermal tritment of cast-iron.....</b>	<b>120</b>
<b>V.3. Chemical-thermal treatment of metals.....</b>	<b>122</b>
<b>V.4. Thermal treatment of aluminium and</b> <b>aluminium alloys .....</b>	<b>127</b>
<b>V.5. Copper and copper alloys thermal treatment .....</b>	<b>130</b>
<b>Part VI. Plastic deformation treatment .....</b>	<b>132</b>
<b>VI.1. Metal rolling .....</b>	<b>134</b>
<b>VI.2. Metal Forging.....</b>	<b>139</b>
<b>VI.3. Metal stamping.....</b>	<b>141</b>
<b>VI.4. Metal Punching.....</b>	<b>143</b>
<b>VI.5. Metal Drawing.....</b>	<b>147</b>

<b>Part VII. Metal Welding</b> .....	<b>149</b>
VII.1. Welding Production Technology .....	149
VII.2. Sources of welding (electric) current .....	153
VII.3. Types of weld joints. Basic concepts about the weld joints elements. ....	155
VII.4. Methods of welding. ....	159
4.1. Manual electric arc welding.....	159
4.2. Flux electric arc welding. ....	164
4.3. Electric slag welding.....	166
4.4. Gas-shielded welding.....	168
4.5. Plasma welding.....	175
4.6. Electron beam welding .....	177
4.7. Oxygen-fuel gas welding .....	179
4.8. Electric resistance welding .....	183
<b>Part VIII. Surfacing of metals</b> .....	<b>187</b>
<b>Part IX. Soldering of metals</b> .....	<b>193</b>
<b>Part X. Non-metal materials</b> .....	<b>197</b>
X.1. Polymers .....	197
1.1. Definition and Classification .....	197
1.2. Technologies for producing plastic products.....	200
1.3. Plastics casting.....	204
1.4. Welding of plastics .....	206
X.2. Rubber .....	211
2.1.Types and properties.....	211
2.2. Vulcanization of rubber .....	213
<b>Part XI. Powder metallurgy</b> .....	<b>217</b>
XI.1. Methods for metal powder manufacturing .....	217
XI.2. Hard alloy products manufacturing .....	225
<b>Bibliografi</b> .....	<b>227</b>
