Contents

List of Acronyms ..... **ix**
Preface ..... **xiii**
Acknowledgments ..... **xv**
About the Authors ..... **xvii**

1 Introduction **1**
1.1 Motivation 1
1.2 Structure of the Book 4
References 5

2 Software Risk Management and Human Factors **7**
2.1 Overview of Risk Management Development 7
2.2 Incompleteness of Risk Assessment Methods 10
2.2.1 Neural Networks–Based Risk Analysis Methods 11
2.2.1.1 Influence Diagrams for Software Risk Analysis 11
2.2.1.2 Enhanced Neural Network Technique for Software Risk Analysis 12
2.2.1.3 Neural Networks Approach for Software Risk Analysis 12
2.2.1.4 Software System Quality Risk Analysis Using Bayesian Belief Network 12
2.2.2 Qualitative-Based Risk Analysis Methods 13
2.2.2.1 SEI Risk Management Paradigm Software Risk Evaluation 13
2.2.2.2 Quality Risk Analysis for Whole Software System 13
2.2.3 Software Metrics–Based Risk Analysis Methods 13
2.2.3.1 Software Risk Assessment and Estimation Model 14
2.2.3.2 Risk Assessment Model for Software Prototyping Projects 14
2.2.3.3 Source-Based Software Risk Assessment 14

2.2.4 Early Risk Estimation–Based Risk Analysis Methods 14
2.2.4.1 Methodology for Architecture-Level Reliability Risk Analysis 15
2.2.4.2 Software Risk in Early Design Method 15
2.3 Risk Management Summary and Further Research Motivation 15
2.4 Human Factors in Software Engineering 20
2.4.1 Human Errors, Mistakes, and Failures 22
2.4.2 Influencing Factors 25
2.5 Summary of Human Factors 30
References 32

3 Software Engineering, Team, and Responsibilities 39
3.1 Software Engineering Background 39
3.1.1 Software Engineering Characterization 39
3.1.2 Software Product 42
3.1.3 Software Development Process 45
3.1.4 Software Development Resources 52
3.1.5 Software Product Use 57
3.1.6 Software Maintenance 58
3.2 Software Team 61
3.2.1 Organizational Structures in IT 62
3.2.1.1 Functional Organization 62
3.2.1.2 Projectized Organization 64
3.2.1.3 Matrix Organization 66
3.2.1.4 Organizational Structure of a Software Company 67
3.2.2 Software Roles and Responsibilities 69
3.2.2.1 Project Manager 69
3.2.2.2 Team Leader 71
3.2.2.3 Business Analyst 72
3.2.2.4 Software Architect 73
3.2.2.5 Software Developer 75
3.2.2.6 Software Tester 76
3.2.2.7 Quality Engineer 77
3.3 Summary of Software Engineering and Software Roles 78
References 83

4 Discovery of IT Human Factors 87
4.1 Classical Failure Mode and Effect Analysis 87
4.1.1 Concept of Failure Mode and Effect Analysis 88
4.1.2 Methodological Steps in FMEA 90
4.1.3 Software FMEA 94
4.2 Adopted FMEA for Software Personnel 95

4.2.1 Performing Software Human Factor FMEA....96
4.2.1.1 Software Human Factors FMEA of Project Manager Role....99
4.2.1.2 Software Human Factors FMEA of Team Leader Role....106
4.2.1.3 Software Human Factors FMEA of Business Analyst Role....114
4.2.1.4 Software Human Factors FMEA of Software Architect Role....121
4.2.1.5 Software Human Factors FMEA of Software Developer Role....127
4.2.1.6 Software Human Factors FMEA of Software Tester Role....135
4.2.1.7 Software Human Factors FMEA of Software Quality Engineer Role....141
4.3 Summary of Software Human Factors FMEA....147
References....150

5 Definition and Evaluation of IT Human Factors....151
5.1 Five Personal Features....151
5.2 Matching Big Five Traits with IT Human Factors....155
5.3 Evaluation Test....157
5.4 Summary of Definition and Evaluation of IT Human Factors....161
References....166

6 Model Development for IT Human Performance Prediction....167
6.1 Experimental Design and Analysis....168
6.2 Algorithm for Conducting Experimental Design....170
6.2.1 Recognition and Statement of Problem....170
6.2.2 Preplanning the Experiment....171
6.2.2.1 Parameters of Optimization and Their Requirements....171
6.2.2.2 Input Factors Requirements....172
6.2.2.3 Select Type of Planned Experiment....174
6.2.3 Performing Experiment and Analysis of Results....174
6.2.3.1 Planning the Experiment....174
6.2.3.2 Statistical Analysis....179
6.2.3.3 Interpretation of Results....179
6.3 Development of the IT Human Performance Prediction Model....182
6.3.1 Recognition and Statement of Problem....182
6.3.2 Preplanning Experiment....186
6.3.2.1 Choice of Factors, Levels, and Range....186
6.3.2.2 Selection of Response Variable....187
6.3.2.3 Choice of Experimental Design....188

6.3.3 Realization and Analysis of Experiment 188
6.4 Developed Model for IT Human Performance Prediction 217
6.5 Summary of Predictive Model Development 219
References 223

7 Experimental Validation of Predictive Model for IT Human Performance 225
7.1 Actual Model Application 225
7.1.1 Basics of Model Application 225
7.1.2 Examples 227
7.2 Software Human Factors Test Web Application 231
7.2.1 Description of Web Application 231
7.2.2 Analysis of Gained Information 236
7.3 Summary of Experimental Model Validation 238
References 239

8 Conclusions and Future Directions 241

Index 251
