Preface to the fifth edition	xi
Acknowledgements	xiii
<b>1. Introduction</b>	<b>1</b>
General	1
Naval Architecture and the Naval Architect	1
Safety	5
The Impact of Technology and Computers	5
Summary	7
<b>2. Definition and Regulation</b>	<b>9</b>
Introduction	9
Definition	9
Displacement and Tonnage	17
Freeboard and Load Lines	19
International and National Regulatory Bodies	20
Standards	29
Summary	32
<b>3. Ship Form Calculations</b>	<b>33</b>
Introduction	33
Approximate Integration	33
Spreadsheets	44
Summary	46
<b>4. Flotation</b>	<b>47</b>
Introduction	47
Equilibrium	47
The Metacentre	50
Trim	55
Hydrostatic Curves	58

Problems in Trim	59
Transverse Weight Movements	61
Summary	62
<b>5. Stability</b>	<b>63</b>
Introduction	63
The Approach	64
Stability at Small Angles	64
Special Cases in Stability	67
The Inclining Experiment	71
Stability at Large Angles	73
Statical Stability ( <i>GZ</i> ) Curves	76
Cross Curves of Stability	77
Weight Movements	80
Dynamical Stability	82
External Influences	84
Stability Standards for the Intact Ship	86
IMO Criteria	88
Warship Intact Stability	89
Comment on Stability Standards	91
Stability of Small Craft	93
Flooding and Damaged Stability	93
Stability in the Damaged State	101
The Probabilistic Approach	102
Stability Standards for the Damaged Ship	106
Damage Stability Standards for Warships	108
Continuing Work	111
Summary	113
<b>6. Launching, Docking and Grounding</b>	<b>115</b>
Introduction	115
Launching	116
Docking	120
Grounding	125
Summary	129
<b>7. Resistance</b>	<b>131</b>
Introduction	131
Fluid Flow	131
Numerical Methods and Computational Fluid Dynamics	134
Types of Resistance	136
Calculation of Resistance	145

Methodical Series	150
Roughness	153
Resistance in Shallow Water	154
Form Parameters and Resistance	154
Model Experiments	157
Full-Scale Trials	158
Effective Power	159
Summary	160
<b>8. Propulsion</b>	<b>161</b>
Introduction	161
General Principles	161
Propulsors	163
The Screw Propeller	165
Propeller Thrust and Torque	172
Presentation of Propeller Data	175
Hull Efficiency Elements	180
The ITTC Performance Prediction Method	184
Cavitation	186
Other Propulsor Types	192
Ship Trials	196
Main Machinery Power	200
Summary	202
<b>9. The Ship Environments</b>	<b>205</b>
Introduction	205
The Ocean Environment	205
The Atmosphere	206
The Ocean	209
Ice and Cold Weather	221
Other Extreme Environments	223
Marine Pollution	224
Human Factors	232
The Internal Environment	234
Summary	241
<b>10. Seakeeping</b>	<b>243</b>
Introduction	243
Ship Responses	243
Ship Motions	245
Presentation of Motion Data	247
Limiting Factors	251

Overall Seakeeping Performance	254
Acquiring Seakeeping Data	255
Hazards Due to Wave Resonance Effects	256
Deriving the Motions	258
Effect of Ship Form	259
Stabilisation	260
Summary	262
<b>11. Vibration, Noise and Shock</b>	<b>265</b>
Introduction	265
Ship Vibrations	266
Calculations	267
Vibration Levels	272
Noise	273
Shock	274
Summary	275
<b>12. Manoeuvring</b>	<b>277</b>
Introduction	277
Directional Stability and Control	278
Manoeuvring	279
Manoeuvring Devices	285
Rudder Area, Forces and Torques	290
Ship Handling	292
Dynamic Stability and Control of Submarines	294
Underwater Vehicles, General	296
Predictions of Manoeuvrability	296
Modifying a Ship's Manoeuvring Performance	297
Summary	298
<b>13. Structures</b>	<b>299</b>
Introduction	299
Nature of a Ship's Structure	300
Modes of Failure	301
Forces on a Ship	303
Longitudinal Strength in Waves	305
Section Inertia and Modulus	311
Superstructures	315
Standard Calculation Results	317
Strength of Individual Structural Elements	319
Transverse Strength	324
Some Other Structural Considerations	326

<b>Horizontal Flexure and Torsion</b>	<b>332</b>
<b>Load-Shortening Curves</b>	<b>333</b>
<b>Finite Element Analysis</b>	<b>333</b>
<b>Corrosion</b>	<b>337</b>
<b>Overall Structural Safety</b>	<b>338</b>
<b>Summary</b>	<b>340</b>
<b>14. Ship Design</b>	<b>343</b>
<b>Introduction</b>	<b>343</b>
<b>The Requirements</b>	<b>344</b>
<b>The Design Phases</b>	<b>344</b>
<b>A Methodical Design Approach</b>	<b>349</b>
<b>Design Configuration</b>	<b>355</b>
<b>CAD Systems</b>	<b>356</b>
<b>Costs</b>	<b>364</b>
<b>Some General Design Problems</b>	<b>366</b>
<b>Safety</b>	<b>370</b>
<b>Summary</b>	<b>377</b>
<b>15. Ship Types</b>	<b>379</b>
<b>Introduction</b>	<b>379</b>
<b>Merchant Ships</b>	<b>379</b>
<b>Specialist Vessels</b>	<b>393</b>
<b>High-Speed Craft</b>	<b>396</b>
<b>Warships</b>	<b>401</b>
<b>Summary</b>	<b>412</b>
Appendix A: Presentation of Data	413
Appendix B: The Displacement Sheet and Hydrostatics	419
Appendix C: Basic Ship Dynamics	439
Appendix D: The Froude Notation	443
Appendix E: Questions	449
References and Further Reading	457
Index	467
