Chapter	Page
1 Bridge Team Management	1
Introduction	1
Team Management:	2
Training and Coaching – Well Being – Morale	
Error Chains:	3
Indications of Error Chain Development – Ambiguity – Distraction – Inadequacy and Confusion – Communications Breakdown – Improper Con or Lookout – Non Compliance with Passage Plan – Procedural Violation	
Casualties and their Causes:	6
Lack of Double Watches – Insufficient Personnel – Calling the Master – Lookouts – Manning the Wheel – Autopilot Changeover – Reducing Speed	
Groundings and their Causes:	6
Planned Track – Track Monitoring – Track Regain – Double Check Fixing – Visual Fixing – Echo Sounder – Light Identification – Decision Corroboration	
Safe Navigation – The Overview	8
2 Passage Appraisal	9
Sources of Information – Ocean Passages – Coastal Passages	
3 Passage Planning	16
No-go Areas – Margins of Safety – Safe Water – Ocean Tracks – Coastal Tracks – Chart Change – Distance Off – Deviation from Track – Under-keel Clearance – Tidal Window – Stream Allowance – Course Alteration – Wheel Over – Parallel Indexing – ARPA Mapping – Waypoints – Aborts – Contingencies – Position Fixing – Primary and Secondary Fixing – Conspicuous Objects – Landfall Lights – Fix Frequency & Regularity – Additional Information – Reporting Points – Anchor Clearance – Pilot Boarding – Tug Engagement – Traffic Areas	

Chapter **Page**

Situational Awareness: 31
Transits – Compass Error – Leading Lines – Clearing Marks – Clearing Bearings
Range of Lights: 33
Geographical – Luminous – Nominal – Landfall Lights – Extreme Range
Information: 37
Echo Sounder – Overcrowding –Planning Book – Conning Notes
Masters Approval: 37
Plan Changes – AIS

4 **Executing the Passage/Voyage Plan** 38
Tactics: 38
ETA for Tide – ETA for Daylight – Traffic Conditions – ETA at Destination – Tidal Stream & Current – Plan Modification
Additional Personnel: 38
Briefing – Fatigue
Preparation: 39
for Voyage – of Bridge

5 **Monitoring the Ship's Progress** 41
Fixing: 41
Method – Visual Bearings – Frequency – Regularity – EP – Soundings
Cross Track Error: 42
Time Management: 43
Lookout: 43
Observation: 44
Under-keel Clearance – Waypoints – Transits – Leading Lines – Natural Leading Lines – Clearing Marks & Bearings – Dipping Distances – Light Sectors
GPS 46

6 **Teamwork** 47
Training and Coaching 48
Scenario 51

7 **Navigating with a pilot on board** 55
Planning – Master/Pilot Information Exchange – Responsibility – Monitoring

Chapter **Page**

8 Navigating with integrated bridge and electronic chart systems 57
(by Captain T. J. Bailey FNI)
Training requirements and recommendations – The ISM Code and training requirements – The need for type specific training – Requirements of Electronic Chart Display and Information Systems – Precautions for IBS operators – Typical IBS configurations with ECDIS – Electronic charts – ECDIS accuracy – Passage planning
ECDIS References and Publications 76
Definitions 76
Further reading 78

9 Guidance on keeping a navigational watch with reference to STCW95 Code Part B Chapter VIII Part 3-1 with commentary 79

10 IMO Resolution A 893(21) Passage Planning with commentary 85

Annex **Page**

I Watchkeeping arrangements and principles to be observed as defined in STCW'95 Code Section A-VIII/2 94

II Upkeep of the chart outfit 102
