Learning objectives:			
/ANNOTATION/			
Teaching Specialised English – Part 1 to students in Marine Engineering aims at introducing maritime lexis and basic structures of the Specialised English language. The emphasis is laid on developing reading comprehension and translation skills in their professional field. The course ensures acquiring engineering and maritime vocabulary and introduction to the specificities of the technical style and the genres used in the professional communication. The purpose of the course is to provide the terminology, the linguistic and communicative skills required for the fluent use of the English language in the professional environment.			
CONTENTS:			
Training Area		Hours Lectures:	Hours seminar exercises:
The course is designed to meet the specific needs of the students and is determined by both their language knowledge and end objectives. However, core subject areas for a Marine Engineering English Language- Part I course will include: fluency enhancement, improved writing and speaking skills, sector-specific vocabulary, i.e. general technical English terminology as well as vocabulary in the field of general arrangements of ships, types of ships and ship power plants.		0	30
