Department	Navigation, Transport Management and Waterways Preservation Department		
Faculty	Faculty of Naval Architecture		
ANNOTATION/Learning objectives: The course aims at providing students with theoretical knowledge of maritime terminology as well as building skills for reading comprehension of excerpts from Guides to Port Entry which are present on the bridge of most merchant ships. The course aims at familiarizing students with basic terms associated with certain publications of the British Admiralty as well as building skills in reading comprehension of Pilot Books, Notices to Mariners, Mariner’s Handbook and other Admiralty nautical publications used by seafarers. The information and terminology present in the Admiralty charts, basic meteorological abbreviations and terminology are studied as well. The syllabus complies with the recommendations of the IMO Model Course 3.17 Maritime English.
